

SOLAR POWERING SCHOOLS

- Million Solar Stars is installing solar arrays in 1,000 schools by 2025 through key corporate and philanthropic sponsorships.
- Schools can now capitalize on solar for educational, environmental, and financial benefits.
- Sponsorship provides schools with a pilot (1 - 5kW) educational solar power system, data monitoring, and curriculum.

**1,000
Schools!**

Mkamenyi Primary
School in Kenya

Students are developing hands-on solar power models and analyzing environmental and economic advantages of scaling up solar energy. Benefits include saving thousands of tons of CO², saving millions of litres water, and providing an additional revenue source and income savings for schools.
